

SHIVA MISHRA

AI/ML Engineer | Multi-Agent AI Systems | MLOps | Network Automation

📞 +91 6393320846 ✉ 21shiva12mishra@gmail.com 🔗 linkedin.com/in/shivamishra1 🐙 github.com/bydefaultuser 📍
Hyderabad, India

Summary

AI/ML Engineer and Systems Architect with production experience building multi-agentic AI systems, MLOps pipelines, and enterprise network automation platforms. Early adopter of Model Context Protocol (MCP) — deployed production MCP-based multi-agent systems within months of its release. Rare combination of AI Engineering, DevOps, and Network Automation with hands-on team leadership experience.

Experience

Keyspark Technologies

April 2025 – Present

Lead AI/ML Engineer and Systems Architect

Hyderabad, India

- Architected production-grade autonomous network operations platform using MCP to orchestrate 7 specialized AI agents across Nautobot, Batfish and VictoriaMetrics — reducing CVE remediation planning from days to under 2 hours
- Designed fault-tolerant microservices architecture with graceful restart, job queue checkpointing and service isolation across 20+ containerized services ensuring zero cascade failures
- Built single-tenant SaaS architecture with Terraform-automated client onboarding — dedicated AWS EC2 environment per enterprise client provisioned in minutes via Infrastructure as Code
- Implemented human-in-the-loop approval workflow — AI generates remediation plans, senior engineer approves via ticketing before any network changes are applied
- Leading team of 5 engineers — architecture decisions, code reviews, sprint planning and weekly releases

Convdata

2024 – 2025

AI Engineer Intern

Remote

- Built production multi-agent AI system for healthcare behavioural analysis using LangChain and LangGraph
- Implemented LangGraph state machines managing agent decision trees, tool calling and conditional workflow branching

Quirk.tech

November 2024 – April 2025

Data Science Intern

Bhubaneswar, India

- Built AI-driven WAF alert classification system using LLMs, RAG and Supabase vector search reducing cybersecurity false positives
- Designed end-to-end ML pipelines for predictive analytics and customer segmentation

Projects

Autonomous Network Operations Platform | Keyspark Technologies (Private)

- Production enterprise system — autonomous network assessment, CVE remediation, golden config management, what-if analysis, real-time monitoring and automated ticketing
- Built on industry standard open source tools: Nautobot, Batfish, VictoriaMetrics and ChromaDB

Education

Alliance University

2025

Master of Science in Data Science

Bengaluru, Karnataka

CSJM University

2023

Bachelor of Science in Mathematics (Minor: Physics)

Kanpur, Uttar Pradesh

Technical Skills

AI/ML: LLMs, Multi-Agent Systems, LangChain, LangGraph, MCP, RAG, ChromaDB, PyTorch, TensorFlow, Hugging Face, NLP, Generative AI

DevOps/Cloud: AWS (EC2, ECS, ECR, RDS, S3, CloudWatch), Terraform, Docker, GitHub Actions, CI/CD, Linux

Network Automation: Nautobot, Batfish, VictoriaMetrics, Telegraf, SNMP, Nginx, Cloudflare

Databases: PostgreSQL, Redis, ChromaDB, Supabase

Programming: Python (Expert), SQL, Bash

Certifications

AWS Certified Cloud Practitioner — In Progress (2026)

Exploratory Data Analysis for Machine Learning — Coursera (2024)

Snowflake for Data Science: Intro to Snowpark ML for Python — Coursera (2024)
